Professional Summary

Final-year Computer Science student specializing in AI and Machine Learning with a strong foundation in analytical methodologies and a passion for solving complex technical challenges. Demonstrated expertise in architecting end-to-end machine learning pipelines, developing computer vision systems, and deploying interactive applications using Streamlit. Continually advancing my proficiency in backend development and data analytics to augment my professional skill set and broaden my industry experience.

Education

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering (AI and ML)

Sep 2023 – May 2027

Bhopal, Madhya Pradesh

Skills

Languages: Python, Java, JavaScript

Databases: SQL, MongoDB, Redis

Frameworks/Libraries: React, Node.js, Django, Spring Boot

Tools: Git/GitHub, Linux, Docker, VSCode, Cursor, PyCharm, Yarn

Analytical Tools: Excel, PowerBI, Tableau, Snowflake

AI/ML: TensorFlow, OpenCV, Scikit-learn, Streamlit, HuggingFace, Gradio, RAG, LLM

Experience

Metaversity - Metaverse Club

Jan 2025 – March 2026

Technical Team Co-Lead

VIT Bhopal

- Managed technical logistics for a series of university-wide technology workshops and competitions, coordinating cross-functional groups to optimize system integration and deliver successful, large-scale events.
- Developed immersive augmented reality (AR) game levels for an annual collegiate festival, successfully engaging over 100 participants through interactive design and seamless technical implementation.

SEDS Nebula

Feb 2025 – Feb 2026

Design Team Core Member

VIT Bhopal

- Developed promotional materials including email drafts, event branding, and marketing collateral to enhance organizational outreach by 20%.
- Collaborated with multidisciplinary teams to coordinate and execute large-scale university hackathons and festivals, ensuring the seamless integration and successful delivery of all event operations.

Projects

Distance and Object Identifier for the Visually Impaired | YOLOv8, OpenCV, Streamlit

November 2024

- Implemented real-time object detection, persistent object tracking, OCR-based text recognition, and browser-based voice feedback in a unified multi modal system.
- Optimized inference performance using confidence filtering, frame skipping, lightweight tracking, and prioritized warning pipelines, achieving approximately 5–8 FPS real-time performance on CPU-based execution.

Customer Churn Prediction System | Python, Streamlit, Pandas, XGBoost

May 2026

- Developed and trained a Random Forest classification model to predict customer churn, achieving 78.25% accuracy and an 81.70% ROC-AUC score, demonstrating robust classification performance and high efficacy in identifying customer risk.
- Optimized model performance to achieve a precision of 58.76%, a recall of 60.96%, and an F1-score of 59.84%, effectively balancing error rates while maximizing the accuracy of customer churn identification increasing performance by approximately 18%.

Certification

- [Smart India Hackathon 2024: Internal Round Finalist](#)
- [Coursera Applied Machine Learning In Python](#)
- [NPTEL Cloud Computing Certification](#)
- [NPTEL Introduction to Internet of Things](#)
